Sonoma Valley Toilet Rebate Program

Questions? Call us!

Sonoma Valley Water Conservation Program- (707) 547-1968

Water Smart Home Program- (707) 547-1910

Sonoma Reuse-Recycle Center- (707) 996-5423

How to Participate:

- 1** Read and understand the Program Eligibility and Rules.
- 2** Purchase and install a toilet on the **List of Qualifying Toilet Models**. Recycle the old toilets at the Sonoma Reuse-Recycle Center. Save the receipts to mail in with the rebate application.
- 3** Confirm the model numbers match the toilet name form the List of Qualifying Toilet Models.
- 4** Complete application form, enclose receipt(s) and mail to:
SV HET Rebate Program
PO Box 11628
Santa Rosa, CA 95406

List of Qualifying Toilet Models

The List of Qualifying Toilet Models is available by calling the water conservation office at 547-1968, visiting your local plumbing supply store, for download at www.sonomacountywater.org/rebates, and can be picked up from your water retailer. The List of Qualifying Toilet Models meet standards to ensure water savings and flush performance. For more information about toilet testing and flush performance, visit www.cuwcc.org/maptesting.lasso or call the water conservation office at (707) 547-1968.

What is a High Efficiency Toilet?

High-efficiency toilets (HET) are fixtures that use 20% less water than the standard 1.6 gallon per flush (gpf) toilet. On average, HET's use 1.28 gpf or less, depending on the model. Generally, there are two types of HET's, dual-flush and pressure-assist.

Pressure-Assist

Pressure-assist toilets have a sealed vessel inside the tank that compresses a pocket of air inside as water fills. When the toilet is flushed, the pressurized air forces the water rapidly into the bowl, creating a powerful, fast flush that has a "whoosh" sound. The flush can be slightly louder than standard toilets. Most pressure-assist toilets use about 1.0 to 1.2 gpf.

Dual-Flush

Dual-flush toilets save water by offering two different flush volumes; one for solids and one for liquids. By selecting which flush to use, you can reduce water usage by only using what you need. Most dual-flush toilets use 1.6 gpf for a full flush and 0.8 gpf for a reduced flush. Studies show that dual-flush toilets will average about 1.3 gpf.

High-Efficiency Toilet Rebate Program

Program Eligibility and Rules

- 1) Site must be an active customer of one of the following: Sonoma Valley County Sanitation District, City of Sonoma, Valley of the Moon Water District, OR be directly adjacent to VOMWD boundaries. If you are unsure if you qualify, please call 547-1968.
- 2) The home or building was constructed prior to 1992.
- 3) Rebate applications must be postmarked within 90 days of purchase date.
- 4) Old toilet must use more than 1.6 gallons per flush.
- 5) The toilet model you purchase must be on the List of Qualifying Toilet Models.
- 6) Incomplete applications and those without *original purchase receipts* will be denied.
